August 2018

Survey of Grantee Demographics Results

A Data Book for the William and Flora Hewlett Foundation
Executive Summary

The William and Flora Hewlett Foundation makes grants to a wide range of institutions in the United States and around the globe through the following programs and initiatives: Education, Environment, Global Development and Population, Performing Arts, Effective Philanthropy, the Madison and Cyber Initiatives, and Special Projects. Regardless of program area, the foundation's approach is rooted in honesty, integrity, high standards and ethics, and a commitment to fair and respectful treatment for all. These values form the basis for Hewlett's guiding principles, including its pledge "to promote the values and practice of diversity, equity, and inclusion in our workforce, our culture, and our grantmaking."

In demonstration of its commitment to diversity, equity, and inclusion, the foundation has implemented several practices to help "develop enough awareness of difference—enough mutual understanding and cultural sensitivity—that people can raise what matters to them, and to help the foundation learn from the enriched dialogue and relationships that result." These practices include, but are not limited to, incorporating questions about inclusion of diverse voices and perspectives in the outcome-focused philanthropy (OFP) guidance for strategy development and implementation; supporting sector efforts to increase diversity; and understanding the composition and experiences of the foundation’s grantees.

To support the implementation of these and other practices, the foundation partnered with Harder+Company Community Research to design and administer a survey of grantee demographics. The survey, administered in Winter 2018, gathered demographic information on the race/ethnicity and gender of board members and staff of the foundation's U.S.-based grantee organizations that were active as of November 2017.

This databook includes foundation- and comparative program-level survey findings. Key questions centered on race/ethnicity and gender demographic information for grantees' boards, head(s) of organization, senior staff, and other staff. Key findings about grantees’ race/ethnicity and gender demographics include the following:

- Grantees that completed this survey have an average of 31 percent board members of color.
- Grantees that completed this survey have an average of 36 percent staff members of color (including head(s) of organization, senior staff and other staff).
- Grantees that completed this survey have an average of 43 percent woman/female board members.
- Grantees that completed this survey have an average of 57 percent woman/female staff members (including head(s) of organization, senior staff, and other staff).

The primary purpose of this data book is to present findings from the survey in ways that support foundation staff's learning and reflection. We have intentionally included limited, if any, commentary on charts and tables to allow Hewlett staff to interpret the data in ways that are most informative and important to their grantmaking. We hope that this data book inspires reflection and learning, and helps foundation staff better understand the composition of their current U.S.-based grantees that were active as of November 2017.

Introduction

The William and Flora Hewlett Foundation makes grants to a wide range of institutions in the United States and around the globe through the following programs and initiatives: Education, Environment, Global Development and Population, Performing Arts, Effective Philanthropy, the Madison and Cyber Initiatives, and Special Projects. Regardless of program area, the foundation’s approach is rooted in honesty, integrity, high standards and ethics, and a commitment to fair and respectful treatment for all. These values form the basis for Hewlett’s guiding principles, including its pledge “to promote the values and practice of diversity, equity, and inclusion in our workforce, our culture, and our grantmaking.”

In demonstration of its commitment to diversity, equity, and inclusion, the foundation has implemented several practices to help “develop enough awareness of difference—enough mutual understanding and cultural sensitivity—that people can raise what matters to them, and to help the foundation learn from the enriched dialogue and relationships that result.” These practices include, but are not limited to, incorporating questions about inclusion of diverse voices and perspectives in the outcome-focused philanthropy (OFP) guidance for strategy development and implementation; supporting sector efforts to increase diversity; and understanding the composition and experiences of the foundation’s grantees.

To support the implementation of these and other practices, the foundation partnered with Harder+Company Community Research to design and administer a survey of grantee demographics. The survey, administered in Winter 2018, gathered demographic information on the race/ethnicity and gender of board members and staff of the foundation’s U.S.-based grantee organizations that were active as of November 2017.

This Data Book

The primary purpose of this data book is to present findings from the survey in ways that support foundation staff’s learning and reflection. We have intentionally included limited, if any, commentary on charts and tables to allow Hewlett staff to interpret the data in ways that are most informative and important to their grantmaking. We hope that this data book inspires reflection and learning, and helps foundation staff better understand the composition of their current U.S.-based grantees that were active as of November 2017.

Information gathered through the survey is included in this data book. In the next section we provide a brief overview of the survey sample and key characteristics of survey respondents and non-respondents. In subsequent sections of the data book we include race/ethnicity and gender demographic data at the foundation and at program- and initiative-levels, as well as qualitative feedback from grantees. The survey is included as an appendix.

About The Survey

The survey of grantee demographics included 15 questions (See Appendix for complete survey). Key questions centered on race/ethnicity and gender demographic information for grantees’ boards, head(s) of organization, senior staff, and other staff. The survey also asked grantees to report on their organization’s annual operating budget, re-granting made to other organizations with Hewlett Foundation funds, and whether they served as a fiscal sponsor.

To better understand how data were collected we asked grantees if data they provided in the survey were gathered directly or indirectly from their boards and staff, and which, if any, additional race/ethnicity and gender categories they include in their own demographic surveys. Finally we asked respondents to offer advice to the foundation as it works to understand and further integrate diversity, equity, and inclusion into its various strategies (see Grantee Feedback section for selected respondent quotes). All survey questions, with the exception of those pertaining to basic organizational characteristics, were optional.

The survey’s questions and response choices drew upon publicly available sector standards, especially those established by Guidestar, as well as information gathered through conversations with social-sector leaders deeply engaged in diversity, equity, and inclusion work. An working group comprised of representatives from all Hewlett Foundation programs also provided input and feedback on the survey’s content and design. The reporting standards were chosen to enable alignment with other data sourcing initiatives. To place minimal burden on grantees, respondents were given the option to share information in the form closest to how they originally collected it. For example, for the race/ethnicity category, respondents had the option to identify board members and staff as either Multi-Racial/Multi-Ethnic, or to count a single board member or staff person in more than one specific race/ethnicity category (e.g., Asian/American and Black/African-American). More information about the survey and its questions is included in the following sections of this introduction and throughout the data book.

The survey did not provide any instructions or guidelines on how organizations should collect race/ethnicity and gender demographic data. We did, however, note in the introduction that organizations that did not have demographic data on hand could gather data voluntarily from their boards and staff to complete the survey. We provided the Green 2.0 Demographic Survey Template as an example survey that could be adopted and customized to gather the necessary information to complete this survey.

People at Grantee Organizations

The survey asked grantees to report demographics on four groups of people associated with their organizations: board members, head(s) of organization, senior staff, and other staff. In the survey’s instructions we defined head(s) of organizations as the President, CEO or Executive Director and defined senior staff as individuals who report directly to the President, CEO, or Executive Director. Other staff were defined as any staff not counted as head(s) of organization or senior staff. University grantees were provided different instructions to accommodate the structure of those institutions.

Survey respondents were asked to report counts of their board members, head(s) of organization, senior staff, and other staff. We used this information during our analysis to calculate the percentages of board members and staff who were identified as members of race/ethnicity and gender categories.

---

iv The survey we sent to university grantees included the following guidelines:

**Board Members**: If your organization, department, or school does not have a board, please enter “0.”

**President/CEO/Executive Director**: Please include the head of the organization, school, or department. This may be a dean or department chair, for example.

**Senior Staff**: Please include all staff in your organization, school, or department that report directly to the head of the organization, school, or department and spend any amount of time working at the organization, school, or department. Please do not include researchers to whom the organization grants funds.

**Other Staff**: Please include all staff that spend any amount of time working for the organization, school, or department. Please do not include researchers to whom the organization grants funds.
**Race/Ethnicity Demographics**

The survey included the following nine race/ethnicity categories/response options:

- Asian/Asian American
- Black/African American
- Native American/American Indian/Alaska Native/Native Hawaiian/Other Indigenous Groups
- Hispanic/Latino/Latina
- White
- Multi-Racial/Multi-Ethnic (2+ races/ethnicities)
- Decline to State
- Other
- Unknown (information not collected)

Respondents were able to count a single board or staff member in any applicable race/ethnicity category.

Respondents were also asked to share if they collect more detailed race/ethnicity information than was captured in the survey, if they reported information gathered directly or indirectly from their boards and staffs, and if the information they reported was already available when they received the survey.

**Gender Demographics**

The survey included the following six gender categories/response options:

- Female/Woman
- Male/Man
- Non-binary
- Transgender
- Decline to State
- Unknown (information not collected)

Respondents were able to count a single board or staff member in any applicable gender category.

Respondents were also asked to share if they collect more detailed gender information than was captured in the survey, if they reported information gathered directly or indirectly from their boards and staffs, and if the information they reported was already available when they received the survey.

**Grantee Feedback**

At the end of the survey, we asked respondents for advice to the foundation as it works to understand and further integrate diversity, equity, and inclusion into its programs and strategies and if there were any notes about the data they provided in the survey. Selected quotes from respondents are included in the Grantee Feedback section of the data book.
Survey Respondents

The survey of grantee demographics was emailed to 705 of the foundation’s current U.S.-based grantees that were active as of November 2017. Some 39 survey respondents (6 percent) opted out of the survey and 428 respondents (59 percent) opted to continue on in the survey and answered some or all of the remaining survey questions. A total of 238 grantees (34 percent) did not respond to any part of the survey. The Western Conservation strategy administered its own grantee demographics survey. Fifty-three grantees responded to the Western Conservation survey. Data gathered through the Western Conservation survey is included in this data book.
In total, 759 U.S.-based Hewlett Foundation grantees that were active as of November 2017 were surveyed on the demographic makeup of their boards and staff. Survey response rates varied by program, from 56 percent to 83 percent, with an overall foundation-level response rate of 68 percent. Grantees that receive foundation funding through multiple programs are included in each program’s unique response rate.

*This total includes 706 grantees surveyed through the Harder+Company-administered grantee survey, as well as 53 Western Conservation grantees surveyed through a separate process. Both surveys were intentionally designed to allow for data aggregation.

Surveys were considered “complete” if respondents progressed past the opt-out item (Q4) and explicitly indicated either their willingness to complete the survey, or their desire to not do so.
In order to better understand trends behind survey completion, organizational-level characteristics were compared and analyzed between those grantees that responded to the survey, and those that did not. This analysis was based on grantee data provided directly by the foundation on total grant dollars awarded. There were no statistically significant differences between survey responders and non-responders in total grant dollars awarded.

Of those grantees that responded to the survey, 39 chose to explicitly opt out of providing demographic information on the people at their organization. These opt-outs generally skewed toward larger and more bureaucratic grantee organizations, with one third (13) representing university-based grantees.

Among respondents who opted out of the survey, most (n=20) who provided an explanation for opting out shared that they did not collect race/ethnicity and/or gender demographic data from their boards or staffs. Some of these respondents did not have the capacity to administer such a survey and others were unable to collect the information within the survey’s timeframe. A few respondents (n=5) did not have access to board and/or staff demographic data. One respondent reported having outdated information.

**Respondent Characteristics**

Among the respondents to the survey, we observed a healthy spread of organizational sizes. The largest staff size reported was 14,828, with a median staff size of 16 people (not including board members). Half (fifty percent) of grantee organizations reported staff sizes between 6 and 44 people.

In addition to staff counts, we examined annual operating budgets as a measure of organizational size. Exhibit 3 below illustrates the distribution of budget sizes among respondents.

**Exhibit 3. Survey Respondents’ Annual Operating Budgets (n=458)**

The survey’s introductory section also included a question on whether or not grantees served as fiscal sponsors or re-granted dollars using funds obtained from the foundation. A large majority of respondents (79 percent) reported engaging in neither practice. The table below summarizes all responses to this survey item.

Foundation-Wide Grantee Demographics

This section includes information for all grantees that provided race/ethnicity and/or gender demographic data (n=546)vi. It includes the following sub-sections: 1) People of Color, 2) Race/Ethnicity Demographics, 3) Women/Females, 4) Gender Demographics, and 5) People of Color and Women/Females.

People of Color at Hewlett Foundation Grantee Organizations

Some 452 grantees provided race/ethnicity demographic information for at least one of the following categories: board members, head(s) of organization, senior staff, and other staff. In the survey’s instructions we defined head(s) of organizations as the President, CEO or Executive Director and defined senior staff as individuals who report directly to the President, CEO, or Executive Director. University grantees were provided different instructions to accommodate the structure of those institutions.viii

Some 60 percent of organizations gathered race/ethnicity information directly from their staff and 40 percent gathered race/ethnicity information indirectly. Among respondents who gathered race/ethnicity data indirectly, most (n=92) provided information based on their personal knowledge of staff or through informal conversations, 17 respondents provided information based on observations, and another 15 provided information from personnel files.

For the purposes of this survey, we defined people of color as all individuals who were identified as belonging to a race/ethnicity categoryix other than White or Unknown, or who declined to state their race/ethnicity.

Before reading this sub-section, please note: The unit of analysis for all charts in this sub-section is organizations, not individual people. That is, all n’s represent the total number of organizations included in the respective analysis.

viThis total represents all respondents that completed the first four questions of the survey administered by Harder+Company Community Research and chose not to opt out on additional questions when prompted. It also includes respondents to the Western Conservation survey. Not all respondents included in this total provided race/ethnicity and/or gender demographic data for their boards and staffs.

viiSee footnote ii for guidelines provided to university grantees.

ixWe included the following race/ethnicity categories in the survey: Asian/Asian-American, Black/African-American, Hispanic/Latino/Latina, Native American/American Indian/Alaska Native/Native Hawaiian/Other Indigenous Groups, White, Multi-racial/multi-ethnic, Other, Unknown (information not collected), and Individuals decline to state.
Exhibit 5. Percent Board Members of Color, All Grantees (n=413)

This chart shows the total percent of organizations that have 0-9%, 10-19%, 20-29%, 30-39%, 40-49%, 50-59%, 60-69%, 70-79%, 80-89%, or 90-100% of board members of color in their organizations.

Mean = 31%

Exhibit 6. All Staff of Color, All Grantees (n=442)

This chart shows the total percent of organizations that have 0-9%, 10-19%, 20-29%, 30-39%, 40-49%, 50-59%, 60-69%, 70-79%, 80-89%, or 90-100% of all staff of color in their organizations.

Mean = 36%

---

All staff is defined as an organization’s head(s) of organization, senior staff, and other staff; board members are not included in the all staff count.

Due to rounding, total is greater than 100%.
Exhibit 7. Range and Distribution of People of Color by People Type, All Grantees

In this chart the minimum value is the tick mark at the bottom of the boxplot. The lower line of the blue box is the first quartile and the white line in the box is the mean. The upper part of the box is the third quartile and the tick mark at the top of the boxplot represents the maximum value.

Heads of organizations were intentionally omitted from this chart. The mean people of color among head(s) of organizations is 22 percent (n=427)

Exhibit 8. Range and Distribution of People of Color by Total Annual Operating Budget, All Grantees

In this chart the minimum value is the tick mark at the bottom of the boxplot. The lower line of the blue box is the first quartile and the white line in the box is the mean. The upper part of the box is the third quartile and the tick mark at the top of the boxplot represents the maximum value.
Race/Ethnicity Demographics of Hewlett Foundation Grantee Organizations

The following charts and tables show the percent and count of 1) board members, 2) all staff, which includes head(s) of organizations, senior staff, and other staff, 3) head(s) of organization, 4) senior staff, and 5) other staff, respectively, by the race/ethnicity categories included in the survey. Some 452 organizations provided race/ethnicity information for at least one of the aforementioned categories.

Before reading this sub-section, please note: The unit of analysis for all charts and tables in this sub-section is people. That is, the n represents the total number of people at all Hewlett Foundation grantee organizations included in a given analysis. Each chart includes a note stating how many organizations the people in the analysis represent. The n’s used to determine the percent of a given type of people and the count of a given type of people are different. To determine the percent of people who were identified as each race/ethnicity category included in the survey, we used information from two survey questions (Q5 and Q6). Any respondents who did not respond to both questions were excluded from the sample and analysis. To determine the counts of people who were identified as each race/ethnicity category included in the survey, we used information from one question (Q6).

\(^{ii}\)Other staff represent 452 organizations
Women/Females at Hewlett Foundation Grantee Organizations

Some 452 grantees provided gender demographic information for at least one of the following categories: board members, head(s) of organization, senior staff, and other staff. Of those that reported data, 62 percent of organizations gathered gender demographic data directly from their boards and staff and 38 percent gather gender demographic data indirectly. Among respondents who gathered gender demographic data indirectly, most (n=66) provided information based on their personal knowledge of staff and based on staff’s preferred gender pronouns, 24 respondents provided information based on observations, and another 12 provided information from personnel files. The following charts show the proportion of women/females at Hewlett Foundation grantee organizations.

Before reading this sub-section, please note: The unit of analysis for all charts in this sub-section is organizations, not individual people. That is, all n’s represent the total number of organizations included in the respective analysis.

Exhibit 19. Percent Woman/Female Board Members, All Grantees (n=408)$^1$

\caption{Range and Distribution of Women/Females by People Type}
\end{figure}

\textsuperscript{iii}In this chart the minimum value is the tick mark at the bottom of the boxplot. The lower line of the turquoise box is the first quartile and the white line in the box is the mean. The upper part of the box is the third quartile and the tick mark at the top of the boxplot represents the maximum value.

\textsuperscript{iv}Head(s) of organization were intentionally omitted from this chart. The mean woman/female is 49% (n=432).
Exhibit 22. Range and Distribution of Women/Females by Annual Operating Budget, All Grantees

In this chart the minimum value is the tick mark at the bottom of the boxplot. The lower line of the turquoise box is the first quartile and the white line in the box is the mean. The upper part of the box is the third quartile and the tick mark at the top of the boxplot represents the maximum value.
**Gender Demographics at Hewlett Foundation Grantee Organizations**

The following charts and tables show the percent and count of 1) board members, 2) all staff, which includes head(s) of organizations, senior staff, and other staff, 3) head(s) of organization, 4) senior staff, and 5) other staff, respectively, by the gender categories included in the survey. Some 453 organizations provided gender information for at least one of the four aforementioned categories.

**Before reading this sub-section, please note:** The unit of analysis for all charts in this sub-section is people. That is, the n represents the total number of people at all Hewlett Foundation grantee organizations included in a given analysis. Each chart and table includes a note stating how many organizations the people in the analysis represent. The n’s used to determine the percent of a given type of people and the count of a given type of people are different.

To determine the percent of people who were identified as each gender category included in the survey, we used information from two survey questions (Q5 and Q10). Any respondents who did not respond to both questions were excluded from the sample and analysis. To determine the counts of people who were identified as each gender category included in the survey, we used information from one question (Q10).

**Exhibit 23. Percent of Board Members by Gender Category, All Grantees (n=5,572)**

![Pie chart showing gender distribution of board members]

1. Board members represent 408 organizations
2. <1% of respondents were identified as Non-Binary, Transgender or declined to state their gender
3. Due to rounding, total is less than 100%

People of Color and Women/Females at Grantee Organizations

The following charts show the proportion of people of color compared to the proportion of women/females at grantee organizations. In some charts a sub-group of grantees (e.g., fiscal sponsors) are highlighted among other grantees.

Before reading this sub-section, please note: The unit of analysis for all charts in this sub-section is organizations, not individual people. That is, all n’s represent the total number of organizations included in the respective analysis.

Exhibit 33. Percent People of Color and Percent Women/Females, All Grantees (n=448)"
Exhibit 34. Percent People of Color versus Percent Women/Females, University Grantees versus All Other Grantees (n=447)

Dotted lines represent mean percent Women/Females (55%) and People of Color (34%) across Board members and all staff for all grantee organizations.

This chart includes the percent people of color and percent women/females across all four people types from whom we collected data (board members, head(s) of organization, senior staff, and other staff).
Re-Grantors and Fiscal Sponsors

Some 14 percent of survey respondents self-identified as re-grantors; four percent self-identified as fiscal sponsors and three percent identified as both re-grantors and fiscal sponsors. Among all grantees who identified as re-grantors or fiscal sponsors, 22 percent collect race/ethnicity data from organization to which they grant funds and 24 percent collect gender data.

Exhibit 35. Percent People of Color and Percent Women/Females, Re-grantors¹ versus All Other Grantees (n=71)²,³

Grantee Demographics by Program

This section describes grantee demographics across grantee organizations in the Hewlett Foundation’s six programs and two initiatives. It includes the following sub-sections: 1) People of Color by Program and 2) Women/Females by Program.

People of Color by Program

The following charts show the proportions of people of color at each program’s or initiative’s grantee organizations.

Before reading this sub-section, please note: The unit of analysis for all charts in this sub-section is organizations, not individual people. That is, all n’s represent the total number of organizations included in the respective analysis.

Exhibit 41. Percent Board Members of Color by Program (n=436)

This chart is a visual guide only. Similar charts, comparing a single program’s percent people of color to all other programs is included in each program’s data book. The percent of organizations in each column is cumulative and should not be read on a 100% scale.

This chart shows the total percent of organizations that have 0-9%, 10-19%, 20-29%, 30-39%, 40-49%, 50-59%, 60-69%, 70-79%, 80-89%, or 90-100% of board members of color in their organizations.
Exhibit 42. Mean Board Members of Color by Program

- Special Projects (n=28) 31%
- Philanthropy (n=18) 29%
- Performing Arts (n=152) 39%
- Initiatives, Madison (n=37) 24%
- Initiatives, Cyber (n=9) 16%
- GDP (n=69) 34%
- Environment (n=80) 18%
- Education (n=43) 30%

Exhibit 43. Range and Distribution of Board Members of Color by Program

[Boxplot diagram showing the range and distribution for different programs]

In this chart, the minimum value is the tick mark at the bottom of the boxplot. The lower line of the boxes is the first quartile and the white line in the box is the mean. The upper part of the box is the third quartile and the tick mark at the top of the boxplot represents the maximum value.

In this chart the minimum value is the tick mark at the bottom of the box plot. The lower line of the box is the first quartile and the white line in the box is the mean. The upper part of the box is the third quartile and the tick mark at the top of the boxplot represents the maximum value.

Grantee Feedback

Additional Race/Ethnicity and Gender Categories

Twenty-nine respondents (7 percent) reported that they collect more nuanced or detailed race/ethnicity information than was captured in the survey’s categories; sixteen respondents (4 percent) reported that they capture more nuanced gender information. The following exhibits include grantees' feedback on additional race/ethnicity and gender data they gather from their boards and/or staff.

Exhibit 53. Representative Additional Race/Ethnicity Categories (n=30)

What categories does your organization use to collect information on board and/or staff race/ethnicity?

<table>
<thead>
<tr>
<th>Category</th>
</tr>
</thead>
<tbody>
<tr>
<td>Middle Eastern or Middle Eastern/North African</td>
</tr>
<tr>
<td>Asian American sub-categories (Chinese American, Japanese American, Korean American, Nepalese American or East Asian, South Asian, Pacific Islander)</td>

<tr>
<td>Iranian American, Afghan American</td>
</tr>
<tr>
<td>Non-Hispanic White</td>
</tr>
</tbody>
</table>

We do not consider people who are Southwest Asia, North Africa/Arab, Middle Eastern, Muslim, South Asian to be white. Therefore, we ask the following questions:
Are you of Latinx origin?
No, not of Latinx origin
Yes, I am Latinx
If yes, are you Indigena?
If yes, are you Afrodescendiente?

With which of the following regions do you identify in terms of race & nationality?

Do you identify with the original peoples of these regions? (select all that apply)
Southwest/West Asia (Afghan, Turkey)
North Africa (Egyptian, Moroccan)
South Asia (Sri Lanka, Pakistan)
Southeast Asia (Thailand, Vietnam)
East Asia (China, Korea)
African Descent (diaspora)
First Nations/Indigenous
Central Asian (Kazakh, Uzbeki)
Southern Africa (Angola, Zambia)
East Africa (Kenya, Eritrea)
West Africa (Ghana, Nigeria)
Central Africa (Chad, Congo)
Other race
White/European descent

Please note specific race, ethnic and national groups (ie, Iranian and Azeri/Persian, Singaporean and Teo Chew/Hokkien, etc.), and tribal.band affiliations with which you identify (ie, Chiricahua Apache, Quechua, etc.)

</table>

With which of the following sexual orientations do you identify?

- Queer
- Lesbian
- Two-Spirit
- Pansexual
- Gay
- Bisexual
- Asexual
- Demi-sexual
- Same Gender-Loving
- Heterosexual/Straight

Organization asks about sexual orientation
Enhancing Diversity, Equity, and Inclusion at the Hewlett Foundation

At the end of the survey we included two open-ended questions soliciting feedback from grantees on how the foundation can enhance its diversity, equity, and inclusion work and what further notes they would like to share about their demographic data. Advice on how the foundation can integrate diversity, equity, and inclusion and selected responses from grantees are included below. Further notes grantees shared about their data were generally specific to their organizations. However, in Exhibit 56 we include a few comments with broader implications for consideration.

Exhibit 55. Selected Responses on How the Foundation Can Integrate Diversity, Equity and Inclusion (n=270)

In the last few years, the Hewlett Foundation has been focusing internally on its own operations, and externally on its grantmaking, on how to best meet its commitment to diversity, equity, and inclusion. What advice would you offer as the foundation works to understand and further integrate diversity, equity, and inclusion into its various strategies?

Keep talking about it! This socio/cultural change will take years to implement and could require grassroots efforts. I think reaching into universities to discuss opportunities in arts education/advocacy to diverse student bodies could help shift expectations and the workforce in years to come.

It is important to continue to share that it is a priority for the foundation so that it stays top of mind for the organization.

I think expanding diversity is a process that must become less categorized by simple numbers and more about establishing processes that encourage, train and support the development of diverse candidates that reflect the populations that we serve. In that scenario, not all organizations should or must be diverse in the same way. And, simply adding representation around race is insufficient. Class is another aspect of diversity that must be considered and if you do that, the problem becomes extremely complicated.

As a grantee, we would love to receive access to the tools necessary to formally gather information about our own ethnic and gender diversity, and to get feedback from our staff/board about how to integrate diversity, equity, and inclusion. Access to a survey platform with a pre-created survey that our staff members could complete would be great!

We have found in our dealings with Hewlett that the organization is sensitive to these areas. We appreciate their deep interest in our work and their commitment to supporting culturally diverse artistic endeavors.

Differentiate tactics to address diversity of aesthetic results, equity of opportunity, and community inclusion. Find an overarching strategy that acknowledges the complexity of the arts ecosystem, and clarifies how this work impacts each level of an initiative, organization, artwork, governance, etc.

Rural/urban and income/class are strong divides in the US as well, and as such, important for diversity. I would encourage the Foundation to also track and promote diversity across these lines as well.
The foundation, more than most, thinks it is a meritocracy. Yet it hires mostly white people and gives most of its grant money to organizations led by white people. Hewlett has a very white culture. It will take a concerted effort over many years to change that to a culture where people of color feel fully included. Don't forget that your "objective" standards by which you think you are judging potential staff members and potential grantees are not, in fact, objective. They're colored by the foundation's unconscious bias.

A common challenge we've seen organizations and funders with these goals fall into is making equity/diversity/inclusion work separate from the "real" work by making a committee or a separate body that creates goals that aren't integrated into the day to day work of the organization. It's critical to success, to make this work integral to the day to day operations of the foundation.

Ensure the Foundation's grantmaking process and requirements are achievable for the hardest to serve and least resourced target populations and regions. Take into consideration the resource constraints as well as language/learning barriers. We also encourage you to take risks on investing in territories of the country in which you may not have traditionally invested. These new regions may take much longer to show returns on the investment, but offer a great amount of learning as it relates to approaching challenges equitably.

We would appreciate learning the results/analysis of this survey across grantee organizations, and how it will be used to support your efforts. We are also open to receiving assistance from Hewlett and/or its evaluator to collect better data on our Board and staff in the future, which will help with your analysis and our own diversity, equity, and inclusion initiatives.

To not penalize organizations for a lack of diversity, but rather to help facilitate best practices and recognize efforts.

Please continue to bring together the grantee community around the themes of diversity, equity, and inclusion, as you did in Toronto for the 2017 Grantees Meeting. Many of these issues can be bound by our local context. To witness how others have identified and engaged these issues, both successfully and unsuccessfully, is rewarding and empowering.

First of all is important to have a clear and broad understanding of the make up of the population in a region where we want to have impact and then developing strategies including in a meaningful way diverse populations in our work.

The idea of diversity cannot be separated from intersectionality, and often one identity encompasses many identities and experiences, and identity should not limit possibility or potential.

Unrestricted operating grants are GREATLY appreciated. Additional grants for diversifying staff would be helpful.

Define the diversity, equity, and inclusion goals and solicit organization wide feedback on the same. Agree on goals that are time bound, realistic and measurable and agree to report in your Annual Report.

We are tremendously grateful for the wisdom of the Foundation's approach to philanthropy. It is a unique and much needed perspective. The Foundation's openness to feedback, commitment to diversity, and consistent vision for creating a better world make the Foundation one of the most important leaders in philanthropy world-wide. We are honored to be part of the Foundation's vision.
### Exhibit 56. Selected Responses about Demographic Data (n=174)*

<table>
<thead>
<tr>
<th><strong>Is there anything further you would like to note about the data you have provided in this survey?</strong></th>
</tr>
</thead>
</table>
| We are always seeking to improve the diversity, equity, and inclusion of our board, staff and collaborations.  
We will always look for the best candidates for our organization and I would hate for us to have to have a single lens in which to weigh a candidature. At the same time, we want to do everything we can to open up opportunities for greater diversity. For us, diversity includes diversity of political views. I would hope that the work focus on awareness of the importance of diversity, how to open up the talent pool, bias and ways in which we might be restricting access to a diverse talent pool, and less about specific targets.  
We are intentionally recruiting younger members and people of color to our board since our client base is young people of color. As a statewide organization, it is imperative that we stay focused on diversifying our board.  
As [our organization] grows, we are focused on finding new avenues to identify and hire [staff] from a variety of ethnic and geographically (i.e., inner cities, rural, etc.) diverse backgrounds.  
When collecting gender data from our staff and board, we have previously only offered the male/female binary options, but we now look to gather more thorough data by adding additional inclusive options.  
Like most non-profits our size, we do not have the time or manpower to correctly track the demographics you were asking about.  
Breakdowns are reflective of the rural community that we serve  
Our organization is relatively small which makes collection about staff and our board easier to have and maintain. Our challenge is greater when we are asked about the demographics of our close to 70,000 participants annually. Some of our programs have a more direct and longer term relationship with participants and other programs have an indirect relationship which limits our ability to collect first hand demographic data. We do our best to develop educated estimates and have conversations with our partners about who their target population(s) are.  
In the past, our staff has been more diverse in race and gender. However, with contracted funding in the field, we have had to layoff staff as projects have been completed. As for the diversity of our Board of Trustees, members of our board and senior staff have grappled with diversity and equity for years. There just aren’t many members of different races and gender that study what we do. |
Limitations and Considerations

Below we outline limitations of the survey of grantee demographics, data collection process, and analysis. These limitations should be taken into consideration when reviewing information included in this data book.

**Respondents.** We sent this survey to grantee head(s) of organization or the foundation’s key contact. While we encouraged survey recipients to employ help from human resources and other knowledgeable staff to complete the survey, we cannot verify if the person(s) who provided responses on behalf of their organization had the most accurate demographic information available.

**Alignment among demographic categories.** To minimize burden on grantees, we instructed respondents to use available board and staff demographic data to complete this survey. In some instances the race/ethnicity and/or gender categories we included in this survey did not align with grantees’ demographic data. To better understand where this survey’s categories diverged from grantees’ categories, we asked respondents to share what response categories on race/ethnicity and/or gender they gather from their boards and staffs.

**Non-mutually exclusive race/ethnicity and gender categories.** Respondents had the option to include board and staff members in counts for all applicable race/ethnicity and gender categories, even though we also included a multi-racial/multi-ethnic category. As such, the totals for some analyses were greater than 100 percent.

**People types.** Although we provided guidelines in the survey for how to interpret the four people types for whom we were collecting demographic information, those categorizations may not align with the structure of some grantee organizations, especially universities. For example, we anticipated that organizations would include demographic information for a single head of organization. Many organizations, however, reported having more than one head of organization.

**Race/ethnicity and gender self-identification versus identification by another individual.** Survey respondents gathered demographic information directly or indirectly from their boards and staffs. Although we have records of how grantees captured their organizations’ demographic data, those nuances are not accounted for in race/ethnicity and gender analyses.
Appendix: Survey of Grantee Demographics

Thank you for taking the time to complete this survey. The information you provide about the demographics of your board, senior leadership, and staff will help the Hewlett Foundation better understand trends in its grantmaking, as one part of its overall commitment to diversity, equity and inclusion. The data is being collected for the foundation to understand the makeup of its overall grantee pool. It will not be used to make any individual grant decisions and will be seen by staff only in aggregated forms.

Please complete the survey by Monday, March 5. We understand that you have a busy schedule and appreciate your promptness and assistance in completing the survey, which includes just 15 questions. This survey link is unique to you and your organization. You may exit the survey while in process and return to complete it at a later time, using the same link. Please note that your responses will not be finalized until you click ‘submit’ at the end of the survey.

If you are not the appropriate person to complete this survey, and choose to forward this link to a colleague, please contact us as soon as possible at hewlettsurvey@harderco.com, or (833) 891-7100 with the name, title, email address, and phone number of that individual. We can also assist you in identifying the most appropriate staff to complete the survey.

Please be aware that this survey asks specific questions about the race/ethnicity and gender of your organization's staff. Gathering information for this survey may require involving additional staff in the process, such as HR professionals and/or program leaders. If you would like to review the survey questions before submitting your responses online, or share them with other staff to help gather the necessary information, you may wish to download a print version of the survey here.

A few things to note:

- **Grantee information will be anonymized and aggregated.** Harder+Company will not link your name—or that of your organization—with your responses when the data is presented. Harder+Company will report to the Hewlett Foundation on demographic trends among grantees as a whole and by categories, such as by program or organizational size; the foundation may seek to make such data public, but, again, only in aggregate form with organizational anonymity protected.

- **Purpose for collecting the data:** As mentioned above, the foundation is collecting this data to understand better the demographic makeup of its grantee pool, in order to determine whether its processes for grantmaking are sensitive to the broader communities it seeks to serve. Aggregated data will thus be reviewed without knowledge about particular grantees.

- **Focus on race/ethnicity and gender:** While the foundation’s commitment to diversity, equity and inclusion acknowledges a range of traits that are important, this survey is focused more narrowly to align with other data collection efforts, and to make it easier for the greatest number of grantees to participate.

- **Definitions and clarifying information:** We understand that we are asking you to report on what might be considered sensitive information about your organization and staff. Please know that a great deal of consideration went into what data we are gathering, and how we are asking you to report it. The survey draws on publicly available, sector-relevant standards (such as those established by GuideStar) and, where appropriate, includes definitions and clarifications. These reporting standards were chosen to enable alignment with other data sourcing initiatives in the field, should you wish to share your organization’s information with peers or other funders in the future.

- **If you do not already collect this data** on race/ethnicity and/or gender within your organization and/or are not authorized to share this data with us, you can gather the data voluntarily from your staff in order to complete the survey. Here is an example of a data collection template developed by the Green 2.0 Initiative that can be customized and used to gather the necessary information from staff at your organization: Green 2.0 Demographic Survey Template. If you do not collect this information and opt out of collecting it for the
purposes of this survey, or if you choose not to share this information, please indicate that when asked in the survey.

Thank you once again for your participation; we appreciate your time and support in this important endeavor.

1. What is your name, email address, position/title, and the name of your organization? [REQUIRED]
   
   Name: _______________
   
   Email: _______________
   
   Position/Title: _______________
   
   Organization: _______________

2. What is/was your organization’s total annual operating budget in the most recent year for which you have data?

   (Please report a whole dollar amount, without including a dollar sign or any decimal places)

   ___________________

3. Some organizations distribute Hewlett Foundation grant dollars to other organizations or entities as a grantmaker or fiscal sponsor.

   Which of the following statements best describes your organization and its use of the funds allocated by the Hewlett Foundation?

<table>
<thead>
<tr>
<th>Statement</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>My organization <strong>grants</strong> some or all of these funds to other organizations</td>
<td>CONTINUE TO Q3b &amp; Q3c</td>
</tr>
<tr>
<td>My organization serves as a <strong>fiscal sponsor</strong> to one or more other organizations using these funds</td>
<td>CONTINUE TO Q3b &amp; Q3c</td>
</tr>
<tr>
<td>My organization <strong>grants</strong> funds and serves as a <strong>fiscal sponsor</strong></td>
<td>CONTINUE TO Q3b &amp; Q3c</td>
</tr>
<tr>
<td>My organization <strong>does not</strong> grant funds or serve as a fiscal sponsor</td>
<td>SKIP TO Q4</td>
</tr>
</tbody>
</table>

3b. Do you collect data on staff race/ethnicity from these organizations?

<table>
<thead>
<tr>
<th>Yes</th>
<th>No</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>
3c. Do you collect data on staff gender from these organizations?

</tbody>
</table>

4b. It would help us to understand why you are choosing to opt out of survey completion. Please provide as much information as you are comfortable sharing to explain the decision: [SURVEY ENDS]
5. Please indicate the total number of board members, heads of organization (President/CEO/Executive Director), senior staff, and other staff members that your organization has.

(Each staff member in your organization should be counted in one of the categories below. If your organization has any satellite offices based internationally, please report only on staff based in the United States.)

Note: For the purposes of this survey, senior staff are defined as those individuals who report directly to the President/CEO/Executive Director.

<table>

</table>

6. Please indicate how many of your organization’s board members, heads of organization (President/CEO/Executive Director), senior staff, and other staff members identify as the following:

(Each staff member included in the question 5 total above should be accounted for in the following table. Individuals may be counted in multiple race/ethnicity categories if this is how they identify, or if this is how your organization collected their information.)

Note: The race/ethnicity categories below were chosen to be consistent with existing sector-relevant standards. We acknowledge that your organization may collect information on staff race/ethnicity using different or more extensive standards, and encourage you to share these practices in question 7 below.

We also acknowledge that many organizations may collect this information using less detailed, or broader categories than those listed below. In these instances, please report counts on the categories for which you collect data—while all staff members should be accounted for in your reporting, not all race/ethnicity category options need to be utilized.

14. In the last few years, the Hewlett Foundation has been focusing internally in its own operations, and externally in its grantmaking, on how best to meet its commitment to diversity, equity, and inclusion. What advice would you offer as the Foundation works to understand and further integrate diversity, equity, and inclusion in its various strategies?

15. Thank you for sharing this information on behalf of your organization. Is there anything further you would like to note about the data you have provided in this survey?
